

I urge you to maintain New Jersey's current "Do Not Call List" as it currently exists. As a result of the strict guidelines that the telemarketers are required to follow, I have seen a significant reduction in the number of intrusive calls at all hours of the day and evening. Without this law in New Jersey, I, as would all New Jerseyans, be subject to unwanted intrusions into our homes. I work hard and value my home time and privacy and have been encouraged by the impact of the New Jersey Do Not Call List.

Please do not strike it down. It has significantly improved my quality of life with my family.
